Index

Boldface entries are defined terms; italicized *inv* and *act* are investigations and activities, respectively.

Abiotic community, **274**
Abiotic limiting factors, **261**, *262–263inv*
Absorption, **207**
Acetic acid, 63, 70
  pH, 65
Acid precipitation, 71
  pH, 65
Acid rain. *See* Acid precipitation
Acids, **63**
  determination, *66–67inv*
  identifying, 64
  pH, 65
  properties of, 64
  scale for classifying, 65
  uses of, 70
Advantage and levers, 135–137
Aether, 88
Air pollution, 148
Alchemy, 22
Altitude, **276**
Aluminum, corrosion, 72
Ammonia, 6, 63
  pH, 65
Ammonium chloride, solubility, *47inv*
Amoebas, 165
Angiogram, **228**
Angioplasty, 228
Animals
  cell structure, 166–173
  cells, *179act*
  plants compared to, *179act*
Anorexia nervosa, **227**
Anus, **188**
Archimedes, 138
Arrhenius, Svante, 63
Arteries, 187, **188**
Artifical heart, **228**
Ascorbic acid, 68
Atoms, 10, **24**, 85, 164
  kinetic energy, 86

Bacteria, 165
Baking, 70
Baking soda. *See* Sodium bicarbonate, 63
Balance, 129
Balanced diet, 196
Banting, Frederick, 225
Barnard, Dr. Christiaan, 228
Bases, **63**
  determination, *66–67inv*
  identifying, 64
  pH, 65
  properties of, 64
  scale for classifying, 65
  uses of, 70
Beaumont, Dr. William, 207
Benedict solution, 202
Benzene, 6
Best, Charles, 225
Bile, 208
Biodegradable materials, ***291act***
Biodiversity, **282**
  boreal forest, 282
  grasslands, 284
  human impact, 286
  threats to, 286
Biological controls, 269
Biological magnification, **292**
Biomes, **281**
  See also Boreal forest; Grassland; Mountain biomes
  science log, 272
Biosphere
  energy, 234
  matter, 234
Biotic community, **274**
Biotic limiting factors, **264**
Birth rate, **259**
Bismuth, 27
Biuret solution, 202
Blocked artery, demonstration of, *224act*
Blood concentration, life function, 217
Blood pressure, 192
  effect of exercise, *193act*
Blood pressure cuff, **190**, 192
Blood sugar
  circulatory system, 221
  diabetes. *See* Diabetes
  digestive system, 221
  life function, 217
Body temperature, comparing, *215act*
Bogs, 305
Boiling point of water, *18–19inv*
Boreal forest, **281**, 282
  biological diversity, 282
Brand, Hennig, 22
Breezes, 94, 95
Bromine, 26, 27
Brown, Robert, 82–86
Brownian motion, 82, **83**, *84–85inv*
Bulimia nervosa, **227**
Burrowing owls, *256act*

Calcium, 35
Calcium carbonate, 37
Canada's Food Guide, **204**
Capillaries, **188**
Carbohydrates, 196, **199**, 200, **208**
Carbon, 35
Carbon and oxygen cycles, **249**
  global warming, *298act*
Carbon dioxide, 36, 37
  global warming, 297, *298act*
Cardiac arrest, **227**
Careers
  archeologists, 33
  building trades, 115
  concrete finisher, 69
  environmental worker, 260
  firefighters, 99
  habitat specialist, 304
  heavy equipment operator, 142
  insulator, 115
  nutritionists, 198
  painter, 55
  personal care attendant, 229
  plumbers, 33
Carrying capacity, **261**
CAT scan, 190
Cell growth, 156, 180
Cell membrane, 167
Cell regulation, 180
Cell reproduction, 156, 180
Cell structure, 156, 166–173
  adaptation to role, *182inv*
Cell wall, 167
Cells, 156, **164**, 165
  animals, *179act*
  edible model, *171inv*
  energy, 174–175
  interrelations, 174–175
  living, 178
  membrane, 167
  parts of the, 166–167
  science log, 156
  specialized, 181
  transport system, 174–175
  wall, 167
  waste transfer, 174–175
Cellular respiration, **183**, 184, 185, **238**
  carbon and oxygen cycles, 249
CFC, **299**, *300inv*
Chemical digestion, **207**, *208act*
Chemical energy, 130, 238
  ecosystem, *246inv*
Chemical formulas, **36**
  interpreting, *37act*
Chemical properties, **12**
  elements, 25
Chemicals, 6
  disposal, 7, 8
  environment, 7
  home, in the, 9
  storage, 7
Chlorofluorocarbons. *See* CFC
Chlorine, 6, 27, 70
Chloroplast, 167
Cholesterol, 204
Circulatory system, 187, **188**, 189
  blood sugar, 221
  enzymes, 221
  waste products, 221
  water, 221
Clay, **278**
Climate, **276**
  ecosystems, 276–277
  location, *277act*
  oceans, *96inv*, 97
  precipitation, *277act*
  soil, 278
  temperature, *277act*
Clones, 232–233
Closed transport system, 188
Coarse-adjustment knob, 160
Colonoscopy, 229
Competition, **264**
Compost, **251**
Compound microscopes, **158**
  parts of, 160–161
Compounds, 23, **31**
  chemical formulas, 36
  society, in, 30
  testing for, 31
  uses of, 30
Concentrated, **60**
Concentrated products, 60
  environment, 62
  packaging, *61inv*
Concentration, **45**
  consumer products, *45act*
  environment, 60
Concept map, science log, 22
Condensation, 55
Condenser, 160

Conduction, 88, 117
Conductivity, 26
  rate of heat transfer, *90–91inv*
Consumer products, concentration, *45act*
Consumers, **242**
Convection, 89, 117
  heat transfer, *92–93inv*
  insulation, 111, 114
  weather, 93–96
Cooking, 70
Copper, corrosion, 72
Corrosion, 71
  aluminum, 72
  copper, 72
  silver, 72
  steel, *73act*
Corrosive, **71**
